**MOBILITY
FESTIVAL**

the future of
eco-friendly
and
sustainable
mobility

**23-24-25
SEP 2022**
GIRONA

**JOIN THE
EXPO
ZONE**

hosted by

The event will be held in Girona, on 23, 24 & 25 September 2022. The festival, whose first edition takes place in 2022, has an outdoor festival format and runs for a total of three days.

The festival has a full programme featuring an expo zone, activities, “workshops and conferences” and product testing as well as a food area and live music.

A meeting place for the main actors in the transformation of mobility and its most influential audiences, held in the city of Girona, a pioneer in sustainable and eco-friendly mobility, both for the way it has adapted in terms of infrastructure and services and for its cycling culture.

A festival that seeks to gain European recognition within the transport and mobility sector, admired (along with its host city) by other European cities and regarded by the industry and the public as an essential, must-attend event.

The EMF Mobility Festival is a catalyst that is part of the transformation of sustainable and eco-friendly mobility in cities, in this short- to medium-term future in which we are living.

An event that to begin with aims to grow as part of Sea Otter Europe, with a view to becoming a completely independent festival, with its own brand and communications, in the future.
